## **V. ELIGIBLE BUSINESS ASSISTANCE USES**

**5.01** The City and EDA will consider using business assistance tools to assist private development only in those circumstances in which the proposed project meets at least one of the following public purposes:

- A.** To redevelop blighted or under-utilized areas of the community.
- B.** To meet the following housing-related uses:
  - (1)** To provide a diversity of housing not currently provided by the private market.
  - (2)** To provide a variety of housing ownership alternatives and housing choices.
  - (3)** To promote affordable housing for low or moderate income individuals.
  - (4)** To promote neighborhood stabilization and revitalization by the removal of blight and the upgrading in existing housing stock in residential areas.
- C.** To remove blight and encourage redevelopment in the City's commercial and industrial areas to encourage high levels of property maintenance and private reinvestment in those areas.
- D.** In combination with any other use provided for in this section, to increase the City's tax base to ensure the City's long-term ability to provide adequate services for its residents while lessening the reliance on residential property tax.
- E.** To retain local jobs where job loss is specific and demonstrable, increase the local job base and create high quality job growth, and provide diversity in the job base.
- F.** To enhance economic growth and diversity and encourage additional unsubsidized private development in the area, either directly, or through secondary "spin-off" development.

- G. To offset increased redevelopment costs, over and above those costs that a developer would incur in normal development, and to encourage redevelopment and revitalization of the City or specific areas within the City.
- H. To retain a stable and centralized business area and downtown, to assist in assuring the City's continued vitality, culture and identity and to provide for a centralized and convenient location of retail sales and services for City residents.

To accelerate the development process and to achieve development on sites which would not be developed without assistance.

## **VI. BUSINESS ASSISTANCE APPROVAL CRITERIA**

6.01 All new projects the City or EDA approves must meet all of the following mandatory minimum approval criteria. However, meeting these criteria will not guarantee automatic approval of a subsidy.

- A. The assistance must be provided within applicable state legislative restrictions, State Auditor interpretations, debt limit guidelines, and other appropriate financial and legal requirements and policies.
- B. The project must meet at least one of the uses outlined in Section V above.
- C. The project must be in accord with the City's Comprehensive Plan, Strategic Plan and Zoning Ordinances.
- D. The applicant must demonstrate that the project would not be created on the same scale and/or quality without City or EDA Business Assistance. The applicant should maximize the amount of private investment in the project.
- E. The applicant must provide any required market and financial feasibility studies, appraisals, soil boring, information provided to private lenders for the project,

and any other information or data that the City, the EDA or their financial consultant may require to independently review the project.

- F.** An applicant requesting business assistance must demonstrate past successful general development capability or specific capability in the type and size of proposed development in the sole judgment of the City or EDA.
- G.** The applicant receiving business assistance must commit to continue operations within the City for five (5) years. The applicant receiving business assistance through JOBZ must commit to continue operations within the City for ten (10) years or the life of the JOB zone, whichever is longer.
- H.** The applicant must demonstrate evidence of required equity and other project financing sources. The applicant should reduce its level of needed business assistance funding to the lowest possible level and least amount of time by maximizing the use of private debt and equity financing first, and then using other funding sources or income producing vehicles that can be structured into the project's financing, before using additional business assistance funding.

The project must be located in the City or planning to locate in the City before commencing construction.

- J.** The applicant must use all business assistance funding from the City or EDA for land and/or building improvements which increase the property's tax value, foster future economic development within the City, and maintain existing or create additional jobs in the City.
- K.** The applicant must demonstrate a clear and ongoing commitment to the community by providing living wage jobs to their employees and to City residents, and where applicable, by giving priority to those residents. The hourly wage to be paid for jobs created as a result of receiving business assistance from the City or EDA should have minimum wages and benefits of 110% of the Federal Poverty Level for a family of 4 (the 2004 Federal Poverty Level for a

family of 4=\$18,850 times 110% divided by 2080 equals \$9.97 per hour). The Federal Poverty Level is adjusted annually. The governing body reserves the right to approve exception to the wage requirements.

- L. The applicant must meet specific job and wage goals within 24 months of the benefit date; JOBZ relocation projects must meet job and wage goals within 12 months of the benefit date.
- M. The applicant must demonstrate the ability to repay the business assistance if the goals set forth in the business assistance agreement are not met.
- N. The applicant agrees to comply with the annual Business Subsidy Reporting Requirements as required by Business Subsidy Statute M.S. 116J.993-995 and /or JOBZ statute M.S. 469.310-320.

## **VII. BUSINESS ASSISTANCE EVALUATION CRITERIA**

The City or EDA will evaluate all projects on the following criteria for comparison with other proposed business assistance project reviewed by the City and EDA, and for comparison with other subsidy standards (where appropriate). Changes in local markets, construction costs, and interest rates may cause changes in the amounts of business assistance subsidies that a given project may require at any given time.

While some criteria, by their very nature, must remain subjective, the City and EDA have established possible "benchmark" criteria for review purposes. The fact that a given proposal meets one or more "benchmark" criteria does not mean that the project is entitled to funding under this policy, but rather that the City or EDA is in a position to proceed with evaluations of (and comparisons between) various business assistance proposals, using uniform standards whenever possible.

The City or EDA will use the following evaluation criteria:

- A. All proposals should optimize a site's private development potential.

- B. All proposals should create the highest feasible number of jobs on the site given the project's nature and other goals.
- C. All proposals must meet all applicable business assistance criteria established by the City or EDA.
- D. All proposals should create the highest possible ratio of property taxes paid before and after taking into consideration all of the project's goals.
- E. Proposals should normally not be used to support speculative industrial, commercial and office projects.
- F. The City or EDA will not normally provide business assistance to a project that involves an excessive land and/or property price.
- G. The City or EDA will not normally use business assistance for projects that would generate significant environmental or social problems in the opinion of the local, state, or federal government.
- H. Proposals will need to meet the "but for" test. Business assistance will not be granted unless the need for the City's economic participation is sufficient that, without the assistance the project could not proceed in the manner as proposed.

Because it is not possible to anticipate every type of project which may in its context and time present desirable community building or preservation goals and objectives, the governing body must retain the right in its discretion to approve projects and subsidies which may vary from principles and criteria of this policy.

If goals are met in part, the applicant will repay a portion of the Business Subsidy (plus interest) determined by multiplying the Business Subsidy by a fraction, the numerator of which is the number of jobs in the Goals which were not created at the wage level set forth and the denominator of which is the number of jobs agreed to be created.

## **X. ADDITIONAL JOBZ BUSINESS SUBSIDY REQUIREMENTS**

- 10.01 Any time the City of Zumbrota provides a business subsidy to a Qualified Business or Recipient, that business is subject to the wage goals, job goals and other criteria set forth in this policy.
